PALYNZIQ® (pegvaliase injection) Patient alert card

This medicinal product is subject to additional monitoring. This will allow quick identification of new safety information. You can help by reporting any side effects you may get directly to BioMarin via drugsafety@bmrn.com or BioMarin Pharmaceutical Inc. at 1-866-906-6100. Reporting of side effects is also possible via national reporting systems. Reporting forms and information can be found at <https://www.canada.ca/en/health-canada/services/drugs-health-products/medeffect-canada.html>

Patient name: _____ Date of Birth: _____

Allergy information: _____

Other health issues (such as asthma): _____

Pegvaliase can cause severe allergic reactions that may be life threatening and these can happen any time after a pegvaliase injection. **Stop injecting pegvaliase if any of the following symptoms occur**

Symptoms of severe allergic reactions can include:

- Swelling of the face, eyes, lips, mouth, throat, tongue, hands and/or feet
- Trouble breathing or wheezing
- Throat tightness or choking feeling
- Trouble swallowing or speaking
- Feeling dizzy or fainting
- Losing control of urine or stools
- Rapid heartbeat
- Hives (like an itchy, bumpy skin rash) that spreads quickly
- Flushing
- Severe stomach cramps or pain, vomiting, or diarrhea

What to do if you experience a severe allergic reaction:

- Stop injecting pegvaliase
- Use epinephrine injection device as instructed by your doctor
- Seek emergency medical assistance

FOR HEALTHCARE PROFESSIONALS

This patient has been prescribed pegvaliase. Severe allergic reactions have been associated with the use of this product.

For more information about pegvaliase, please refer to the Product Monograph. Please report any suspected adverse reactions to drugsafety@bmrn.com or via national reporting systems. Reporting forms and information can be found at <https://www.canada.ca/en/health-canada/services/drugs-health-products/medeffect-canada.html>
